Stephen Dolainski : Hidden Arizona (1997) before purchasing it in order to gage whether or not it would be worth my time, and all praised Hidden Arizona (1997):

An all-new guide that leads the way to secret adventures in the Grand Canyon State-- Over 24 million people visit Arizona each year. From the awe-inspiring Grand Canyon and the roaring waters of the Colorado River to the spectacular flora of the Sonoran Desert and the rugged rimrock country on the Navajo reservation, Arizona is truly the place for special adventures. Hidden Arizona gets the traveler saddled up and ready to discover them all. First it takes the traveler to the burgeoning cities of Phoenix and Tucson to explore Taliesin West, Frank Lloyd Wright's 600-acre winter residence, and then out to the Pima Air and Space Museum. After kicking back poolside at local resorts, it leads the adventurer out to hidden areas like Window Rock (capital of the Navajo Nation) and the ghost town of Oatman, where the spirit of the Old West thrives. Hidden Arizona details all sorts of restaurants, from nouvelle Southwestern cuisine to the Reata Pass Steakhouse, where you better think twice about wearing a tie -- it will be cut off and hung in the rafters with thousands of others! For those looking to hang their hats and kick up their feet, Hidden Arizona covers everything from the historic Arizona Biltmore and the ritzy Boulders resort to stucco-and-adobe inns like La Posada del Valle or The Triangle L, a working dude ranch. Whether the traveler prefers riding horseback among stately saguaros, floating down the Salt River in an inner tube, exploring the ancient cliff dwellings at Canyon de Chelly National Monument, or hitting the links on championship golf courses, this guide has it covered.
