**Barry Parr : Hiking the Sierra Nevada (Regional Hiking Series)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Hiking the Sierra Nevada (Regional Hiking Series):

0 of 0 people found the following review helpful. a good general area bookBy CustomerIt covers all the major trails, and gives helpful hints... a good general area book...0 of 0 people found the following review helpful. Five StarsBy PhotofreakGreat information in this book...a must have6 of 7 people found the following review helpful. outstandingBy JaymellIn addition to everything you'd expect from a Falcon Guide--accurate trailhead information,

good maps, elevation-gain graphs, topo references, etc.--the descriptions of the hikes are engagingly written, with humor and insight. Covering the entire Sierra is a pretty daunting task, but the author has obviously been hiking in the range for years and I thought the coverage was pretty comprehensive and balanced. In the two areas I'm familiar with, Mammoth and Yosemite, he chose some great hikes. The book is no substitute for local guides, but at least it should help readers choose a region to focus on. To me, this was much more helpful than its cluttered Lonely Planet rival. You feel like you're being conducted along the trails by a personable as well as knowledgeable guide. Since the other reviewers complained about it, I thought there were a sufficient number of few photos. However, a little black and white image is never going to do justice to a Sierra landscape.

This four-season guide samples 96 of the best hikes.

From the Back Cover Stretching from the Feather River to the Kern Plateau, the Gold County foothills east to high desert, the Sierra Nevada is the longest, highest, most diverse mountain range in the continental United States. This four-season guide samples 96 of the best hikes from every quarter of the range, geared to differing levels of skill and experience.
