All atlases have Benchmarks exclusive Landscape Maps with large easy-to-read and page overlap, and a useful GPS grid. The categorized Recreation Guide makes planning your next adventure a breeze. The Recreation Maps have public land ownership shown as color tints, and most titles have hunting unit names and boundariesRecreational Maps: Benchmarks Recreation Maps were created for outdoor lovers who want the high quality recreation information in our atlases but with the convenience of a traditional folding map. Complete public lands detail and hunting unit boundaries are shown as well as categorized recreation listings. | File size: 61.Mb

whether or not it would be worth my time, and all praised Idaho Benchmark Road Recreation Atlas:

2 of 2 people found the following review helpful. Great atlas!By CustomerThe Benchmark atlases are the best. We have them for all the states we do a lot of camping in, or spend time in the backcountry in. They're easy to read, and they point out or label all kind so interesting features. Plus they have a huge section of recreational or educational places of interest.0 of 0 people found the following review helpful. Just Like DeLormeBy cappy102The way things change, it's a good idea to purchase a new atlas every couple of years. So far, Benchmark has done a great job of keeping up. Stapled binding is prone to damage when repeatedly folded open, and I would pay more for a spiral or comb binding, but this is a small issue.Would recommend, will buy another in a couple of years.2 of 2 people found the following review helpful. Five StarsBy astarreUsing this for Rockhounding and finding old mines. The landscape maps have been invaluable.

Idaho's boundless recreational opportunities and varied scenery is skillfully captured in Benchmark's Idaho Road and Recreation Atlas. Landscape Maps show the full range of topography: from the forest stands of the panhandle, the mountainous backlands of central Idaho, to the plains and prairies in the south. The Recreation Guide features complete fishing information, hunting units and listings of campgrounds and RV parks.Map Scale = 1:250,000

Benchmark Maps recently released its Idaho Road Recreation Atlas, which may render the DeLorme Atlas and Gazetteer obsolete. That's not a cheap shot against DeLorme's atlas. It has its flaws, but for years it's been a valuable resource for Idahoans. But Benchmark's atlas seems to have cured all of DeLorme's flaws and created a detailed, easy to use, comprehensive atlas for recreationists. Benchmark spend months in Idaho gathering information and driving 12,000 miles around the state to double check its accuracy. It has three obvious improvements over the DeLorme atlas: the maps on each page overlap so you don't get lost going from page to page, the maps have contour shading so you see mountains, valleys and ridges rather than having to interpret them through topographic lines, and the atlas overlaps border areas with neighboring states. There are many other improvements. (refers to 1st edition). -- --Roger Phillips.
