**Mitchell E. Dakelman, Neal A. Schorr : Images of America: The Pennsylvania Turnpike** before purchasing it in order to gage whether or not it would be worth my time, and all praised Images of America: The Pennsylvania Turnpike:

0 of 0 people found the following review helpful. Stuff You Never Knew ExistedBy Who DatI bought this book before and lent it to a friend who moved away. Then, I bought it again! After reading this cover-to-cover some 15 times, I planned my own abandoned PA Turnpike trip. (Note: Taking pictures of the active tunnel entrances WILL garner State Police attention!). I have bored non-history-freak friends to tears with the information in this book. It is very well-written and comprehensive.0 of 0 people found the following review helpful. Perfect giftBy smcPurchased

as a gift for my 85 year-old mother-in-law. She enjoyed reading about the history of the PA turnpike and remembers when it was being built. 0 of 0 people found the following review helpful. Five Stars By Rory Z. Clawson Includes an excellent narrative as well as many photos I haven't seen before.

The Pennsylvania Turnpike is one of the best-known highways in the United States. Most Pennsylvania Turnpike travelers are unaware that its construction was inspired by the route of the never completed South Pennsylvania Railroad. In the 1930s, men of great vision conceived, planned, and built the nation's first long-distance superhighway using the abandoned railroad's partially finished tunnels as its foundation. Originally predicted to be a financial failure, the project was a tremendous success, and the turnpike came to be known as the World's Greatest Highway. Over the years, the Pennsylvania Turnpike was expanded and improved, laying the groundwork for the nation's Interstate Highway System. The Pennsylvania Turnpike draws from the extensive photograph collection in the Pennsylvania State Archives. Many were taken by photographers hired by both the Pennsylvania Turnpike Commission and its contractors, and most have never been published previously.

About the Author Mitchell E. Dakelman is director of media services for the National Railroad Historical Society. He is an avid collector of transportation photographs, motion pictures, and memorabilia. Neal A. Schorr is a physician in suburban Pittsburgh with a lifelong interest in highway engineering. He designed the plan for widening Pittsburgh's worst traffic bottleneck, the Fort Pitt Bridge and Tunnel.
