Marcus Libkind : Ski Tours in Lassen Volcanic National Park before purchasing it in order to gage whether or not it would be worth my time, and all praised Ski Tours in Lassen Volcanic National Park:

5 of 5 people found the following review helpful. Best Cross Country Sk Book for Lassen Volcanic National Park By Dan Anderson There's something about seeing hot springs and mud pots in winter that I really enjoy--lots of steam and snow! This book has 44 tours in Lassen Volcanic National Park in Northern California. This area is beautiful but less-visited than the Sierra. Each tour is rated with difficulty, length, elevation, navigation, time, and season. All tours have BW copies USGS topos (1 inch per mile scale) with the trail outlined. Each tour has a description of what you see,

where to start, and leads you through the tour. The book also has a list of local lodging and official information sources. Lots of interesting and entertaining ski pictures are sprinkled in the book. The only thing I think is missing would be an index, but that wouldn't stop me from buying the book. Also recommended: *Ski Tours in the Sierra Nevada*, *50 Classic Backcountry Ski and Snowboard Summits in California*, *Ski Tours in Southern California*

Book by Libkind, Marcus

About the Author Although a mechanical engineer by profession, Marcus Libkind is an avid outdoorsman. In his free time he explores the outdoors by foot, kayak, raft, and of course, skis. His love for the wilderness and its winter beauty has led him to spend almost 30 years in search of new and interesting ski tours. As a founding member fo the Nordic Voice, he is actively involved in preserving and protecting wilderness areas which are now threatened.
