**David Krival : Southern California the Channel Islands (Lonely Planet Diving Snorkeling Southern California the Channel)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Southern California the Channel Islands (Lonely Planet Diving Snorkeling Southern California the Channel):

2 of 2 people found the following review helpful. Finally - a book with Central California Listed By Kristine D. Danner Although I didn't find nearly as many acceptable shore dive sites as I was looking for - I thought the book was great. It described the dive sites and characteristics and all the "need to know" stuff. I just wish it would have shown more dives a little further south. Is there any diving say, between, Moonstone Beach and Pismo? Kristine :)

Swaying kelp forests, colorful invertebrates and playful pinnipeds are just a few of the dive highlights offered throughout Southern California and the Channel Islands. Bathed by the cool Pacific Ocean, this region's seamounts, walls and kelp-lined shore dives provide unlimited opportunities for exploration. Encounter calico bass and sheephead at Catalina Islands underwater park. Free-dive through emerald kelp forests, observe blue and mako sharks from the safety of a cage or explore Wreck Alley's Yukon wreck. From the current-swept islands off the coast of Los Angeles to the sunny shores of San Diego, this book highlights 60 of Southern California's best sites. You'll get specific information on: dive site depth range, access and conditions common and hazardous marine life topside activities and attractions comprehensive list of dive services 15 easy-to-read maps
