By A Customer  
I was supremely disappointed with the book, particularly in light of the rave reviews seen on this page. There are no recommendations beyond what could have been provided in a brochure. While the spas are rated, there is no explanation provided on how the rankings were determined. The first section also seemed to indicate spas could get listed simply by sending in material. I was hoping for some indication that someone had actually visited the spa or spoken with someone who has, thereby confirming the information and adding value with meaningful comments about specialities.

This 420 page spa guide is EXCELLENT! It includes a huge list of Invigotry, health, and fitness spas, rating each from "tourist guide" to "deluxe". I was most impressed with its well written reviews- especially the one on the Amadeus Spa. Read it and find the spa best for you!
