Its just long, incoherent rantings next to pictures you can find on Google images. 1 of 2 people found the following review helpful. Great photos, great storytelling! By Dave Harp If you ever wanted to visit the Grand Canyon, this book is for you. I feel like I got to see the sights, ride the rapids, sit around the camp fire, all in the good company of the author and his fellow travelers. This book is candy for the eyes and soul. Enjoy.

Really big adventures usually start in really small ways, for author John Wise, it likely started at age 5. It was back then, during a stop in the Painted Desert on a across-country trip, that a love of travel and exploration all began. On that day, his family got out of the car, not believing how incredible the desert looked. Could it be that the enthusiasm demonstrated by adults before a child is the spark that ignites the curiosity in a young imagination? Forty-two years later, the eyes of that boy set their sights onto the Colorado River and all of the magic, imagination, and curiosity came racing right back into the mind of the child, who was now a man, about to re-experience a kind of excitement nearly lost over time. This book is a reminder to not let go of the truly important things in life; love, a sense of adventure, our freedom, and our knowledge that we have the potential to create a present and a future that exceeds our wildest dreams. As you sit around the campfire of life exploring its bigger stories: Always remember to stay in the magic of a wonderful life, never stop following the trails of your imagination, and strive to find the journeys that will bring you and your loved ones into the beauty of it all.

About the AuthorSelf published first-time author John Wise emerges from a career of innovation in the technology sector and a decade of traveling the breadth of the United States to explore a small corner of the natural world buried in the American Southwest. Leaving the workaholic perspective of the serial entrepreneur, Wise found himself in a nearly incomprehensible journey inwards, discovering his own peace of mind amidst expectations and the power of raw nature. After establishing himself as an influential digital artist and graphic designer during the late 1980s in Frankfurt, Germany where electronic music was just getting its start, Wise returned to the United States in mid 1995, taking up residence in Arizona. Months later he opened one of the worlds first Internet cafes. The next years would see him generating Internet content, helping launch satellite Internet for the consumer, spearheading the worlds first low-cost supercomputer, and engineering various other technology-centric endeavors before striking out to recharge his batteries by visiting the four corners of the American continent.
