Wanted street level maps of Louisville with as much detail as possible. Recently had to turn to public transportation for everything. I was able to mark major bus routes. The internet access to bus schedule information doesn't take into account that I don't mind walking a mile between routes. On line scheduling sends me way off to make a connection only to come back out to where I want to go. Saves about 30 min. on some runs. Glad to have paper on hand rather than relying solely on smart phone apps. Would have been 5 stars but for not having a newer edition. Probably not enough people go old school for paper

Each map is divided into a grid formed by rows and columns. These rows and columns correspond to letters and numbers running horizontally and vertically along the edges of the map. Please note that map pages in this book are numbered according to the PageFinder Map. For this reason your book may look as though it is missing pages.
