Manhattan and Queens, however.0 of 0 people found the following review helpful. Very pleasedBy CharlieVery happy with the maps, they arrived quickly, and in great shape. Thanks!0 of 0 people found the following review helpful. Five StarsBy Eileen Siekierski great reference

THE map is best for Brooklyn, clear and lot informations --Customer on Fifth AveAbout the AuthorFrom travelling the world I understand I have sense of orientation - I started designing catalogs and books with a flow and creating the plans / diagrams to organize content I like to design indexes and table of contents for magazines Began about 30 years ago from organizing lego and other games to create anime replicas From there I continued preparing the design process for marketing and advertising, first analyzing the environment and the client goals; then the photo shoots of products in locations to the copy editors were chosen; then various page styles were planned ed executed to get feedback; further refinement and tweaking were necessary to put the pages on print and or other media [tv, cd rom [wow]] This new project of maps started from a vacuum of design in the market, were other maps are mostly black/white and or designed with the mind of architects or cartographer not the viewer; the user point of view is to have a clear and evident contrast and highlight places to visit/enjoy plus giving more informations to check the surrounding. After 2 years of tweaking maps and a steady clientele distributors [more than 400 stores carries our maps collection just in new york city] I am starting online and national/international sales. Thank you very much for support and beautify
