Who really cares about those guides for motels, restaurants and cheesy attractions anyhow? These guides take one to the real America behind (and often above) the tourist traps! Finch and Wallen team up to the best of their expertise with splendid descriptive writing and photography (the latter always a trademark of this series!). Cape Cod, The Berkshires, the Connecticut and Rhode Island Coasts as well as other areas of natural interest are brought right to the reader and make you want to go there immediately and see what you've just read about.

A photographic tour of the natural wonders and seasonal recreational opportunities of southern New England encompasses more than two hundred sites of ecological and geographical significance in Massachusetts, Connecticut, and Rhode Island. 35,000 first printing.
