Needs pictures and mapsBy mark mikloszThis book would have been more enjoyable if it had pictures. Difficult for the reader to enjoy the story of exotic destinations without getting a visual.

No one expected these thirty-something professionals to give up their successful careers to pilot their own small boat around the world, especially because they started with almost no boating experience. Instead of the expected sailboat, they chose a 43 foot trawler powerboat, which many believed was incapable of crossing oceans. Most people expected them to fail. But they surprised the skeptics when they successfully circumnavigated the globe in two years, visiting 110 places along the way in thirty-four countries. Part 1 of "The Unexpected Circumnavigation" follows Christi and Eric daily as they travel to eighteen exotic South Pacific islands that few people ever see. You will experience the local food and cultures, participate in island tours and adventure activities (include going to the rim of an active volcano!), and feel what it is like to be on long sea passages. Learn about the challenges, rewards and the surprises that come with both traveling and boating.
