**Robert Marx : The World's Richest Wreck** before purchasing it in order to gage whether or not it would be worth my time, and all praised The World's Richest Wreck:

This one looked really great. I spent about twenty minutes studying it before I wrapped it up to give to my highly successful, detail orientated, bean counter daughter, for Christmas. It must be a great book because it's been over a month and she still won't lend it to me to read.

I followed the same strategy with her husband, giving him a book on sunken ships. I expect them both to escape their successful lives any day now and run off in search of pirate gold. The book has proved itself to be an excellent choice! 0 of 0 people found the following review helpful. This is Bob Marx's most significant book concerning the shipwrecks of the world and is literally a culmination of more than 50 years of experience and research. He covers all known shipwrecks of both the Old World and New World whose cargoes contained at least \$10 million worth of treasures. The World's Richest Wrecks contained many maps collected by Marx and more than 100 photos of shipwrecks treasures and diving salvage operations, many in full color!

About the Author Sir Robert Marx has been called the "true father of underwater archaeology" and has been knighted by the rulers of three European countries. He has worked in over 60 countries on more than 3,000 shipwrecks, finding more treasure than anyone else on earth. He has also authored more than 800 articles and 60 books on shipwrecks, history and marine archaeology.
