The text are well written ,and at times somewhat esoteric , but still informative ,and easy to read. The size of the books are very convenient too, they open easy ,and stay open fairly easy so to make for easy reading. These are great books printed in the glory days of the age of the printing press. You will cherish these books .1 of 1 people found the following review helpful. time and the river flowingBy Patricia M. JeschHad this book back in 1970 - gift from my kids. Lost it and finally looked for it here - got a great copy. Best way to see "the River" as it was in late 1960's. I often read bits, look at the pix, use it as an artist's aid when I want something really intense and emotional.

Contains 77 color photographs with text containing quotes on the experience of the Grand Canyon and it's importance
