...By CustomerVery entertaining, inspiring and thought provoking. Paul clearly has a unique take on life; Tina The Blue Bear is more than a point A to point B guy on a bike tale.0 of 0 people found the following review helpful. Five StarsBy Trevor ElliottGreat experience and story.0 of 0 people found the following review helpful. A majestic story of human migration (on a motorbike).By JBHaving read this book, I feel like I've known Paul Emily for years.SPOILER: He rides a motorbike, alone from America to the UK and tells an entertaining/heartfelt/honest story of how the whole trip unraveled.A solid book to read if you're stuck in the monotonous grind of office life, longing looking out of the window.All it takes is some pre-planning, a bike and the drive to create some incredible memories.Thankfully Paul has shared his with us!

The best book Ive ever written! - Paul Emery, Adventurer and First Time Writer "I did adventures here and there but I longed to do something big and scary like Ranulph Fiennes had done when he went to the Poles. This desire sat in me like an unbalanced weight, giving me a sense that I had to always keep moving and if I didnt something bad would happen, I didnt know what that bad thing was, maybe it was a fear to be alone with just my thoughts but I was always on the go and a big expedition, like riding a motorcycle unsupported around the world on my own, might quell this urge, and help me find some peace and let me have my own stories to share, rather than basking in the light of others". - excerpt from the book 26,000 Kilometers, 13 Countries, 19 Times Zones in 93 days. After only one night away, Paul felt ready to set out and ride his motorcycle, Tina, around the world.From knife fights in Siberia to jail time in Kazakhstan, Paul quickly learnt the meaning of adventure.After arriving back home in England, Paul recounts his tales of fear, looking for home, and ultimately facing himself on one of the greatest adventures ever told (probably).
